

I cant begin to exsplain the benefits from My XM radio. Both in home and in the car. So much on the regular radio is not worth listening too. Most have some form of a morning show and do not play songs so you have to put up with dumb and sometimes rude jokes etc.. With the XM depending on my mood I can select from a wide range of format with out all the nonesense and commercials. I pay my subscription fee every month knowing I wont have to listen to all the junk currently offerred on regular radio. NAB petition 04-160 is trying to take choice away from me. Why do I have to listen to what the NAB says I should. If Im a paying customer of a service then prograsmming should be out of the hands of some outside Association. I urge you to reject Petition 04-160 so I can continue to enjoy freedom of choice.Thank-you for your time
